The Sensation.

[Eureka Leader.]

A confirmed opium-smoker relates the sensations imparted by the use of the drug, as follows: He says, as soon as I get well under the influence, it brings a contentment beyond imagination, and a sense of peace such as visits the fabled eater of the lotos—a feeling which in its entirety placed one in a supreme throne, calm as Buddha, ruling royally as a windless, waveless, voiceless kingdom of everlasting rest. To this succeeded a knowledge of power to plan and execute such schemes as are known only to the realm of the gigantic and unattainable, coupled with the thought: "I can do these things, but I will not. What is all else compared with this?" Again the scene shifted, and in a state of semi-consciousness, there followed each other, like a panorama, gorgeous visions of Oriental magnificence, of tall and stately minarets, of palaces glittering beneath a noonday sun, of armies marching forth in all the circumstance of war, conquering and to conquer. Finally the gigantic superseded the beautiful and grand until sleep brought a close to the tremendous imagination of a dream. You awake, but to what? Headache, nausea, a burning, tightening grip at your throat, a general sensation, such as attends the recovery from a New Year's drunk. But the worst of it is there seems only one remedy—smoke again and again, leave care and sorrow and suffering behind. Thus beginning in curiosity, and continuing from seeming necessity, the end is ever and always a death so horrible as to rival the tortures of *mania a potu*.

MINING NOTES.

Several new and rich finds, in both gold and silver ore, are reported in the Tulare mountains.

A ledge of tin ore, said to be one hundred feet wide, is reported to have been found near Albany, Oregon.

Quicksilver in considerable quantity has been found in a ledge of decomposed rock at Pataha City, Washington Territory.

Yavapai county, Arizona, will soon have in full blast twelve quartz mills, as many, if not more, than all the rest of the Territory combined.

For the first time in the history of Sutter Creek, Amador county, there is not a single stamp running at any of the quartz mills in that vicinity.

The Leo Mining Company have arranged for the active development of their mine. An injunction has been obtained against trespassers as a preliminary step.

The flumes and sluice boxes of Sam Hills' claim, in Grant county, Oregon, were cleaned up by thieves, on the night of the 9th instant, and it is estimated that several thousand dollars were stolen.

The river miners of Klamath and Scott Rivers are all quite busy at present getting into their river claims for Summer work, now that the streams are low, and will continue so for three or four months to come.

A party of Mexicans are mining at Temecula, San Bernardino County, gathering loose grains of gold in that locality with a rocker. They say they can average one dollar per day. These placers were worked years ago by white men, and abandoned for better fields.

The Manhattan Company, at Austin, Nev., has a man at work getting the amalgam out of the sewer in Main street. The metal finds its way out of the mill and down into the sewer, and accumulates in the crevices. About every year or so the accumulations pay to take out.

Times-Review gleanings: The twenty stamps at the Grand Prize mill are still crushing ore from the Belle Isle. It is probable that ten stamps will soon be put to work on Grand Prize ore.—A drift has been run 45 feet from the 65 level of the Arcade mine, and the owners are pushing the work vigorously.

Mining operations here and elsewhere throughout the Territory continue to make favorable progress. In several of the districts of Alturas, Boise and Eastern Oregon rich strikes are reported. Most of the mines in this immediate vicinity are turning out their usual supply of gold rock.—*Silver City (Idaho) Avalanche.*

F. P. Willard has assumed the Superintendency of the Bodie-Richmond mine at Bodie. The Bodie-Richmond adjoins the Con. Pacific.

Fifteen thousand shares of stock of the Alaska Gold and Silver Mining Company were sold at Sitka, mostly to miners employed in the mine. An additional force of miners will be taken up next trip of the steamer California. The intention of the company is to enlarge the mill to twenty stamps this Fall.

Wild Jim, a Colorado desperado, thus argues justification of his latest murder: "He'd a shot me if I hadn't a shot him. Do you expect a man to take a risk when he's got a shoo.in' iron in his grip? I didn't care about his dyin', but I sure pop didn't want to die myself. Mebbe he wouldn't a shot me after all, but I hadn't no call to wait and see. In the present disorganized state of society in Colorado, 'taint no man's duty to suppose another man's intentions are good."

The Tuscarora *Times-Review* says: The water is all out of the North Belle Isle shaft, and the foreman is now engaged in putting in an air shaft, or rather in repairing the old one, which had caved while the mine was closed. When the mine is thoroughly ventilated, the work of extending the drift south toward the Belle Isle mine will be commenced.

POLITICAL ADVERTISEMENTS.

MORNING NEWS.

SUNDAY, - - - JULY 27, 1879.

The MORNING NEWS has the largest circulation of any paper published in Mono County, and is being rapidly extended. Advertisers will please note this fact.

Mr. C. W. CRANE, Room 3 Safe Deposit Building, has been appointed agent for the MORNING NEWS in San Francisco. All orders delivered to him or contracts made for subscription or advertising will be recognized by the publishers.

BODIE.

The streets lined with huge prairie schooners, unloading monster loads of freight; large substantial buildings going up like magic on every hand; the streets crowded with men and women, all eager to take a full hand in the race for wealth. Improvements of vast proportions are contemplated that, when completed, will place Bodie in the highway to the position achieved by Virginia City. Blocks of fire-proof buildings to be built, and every preparation that prudence, judgment, foresight, and necessity suggest as a protection against fire, and for the convenience of the extensive business transacted. The whistle of powerful steam hoisting works is heard on the hill along the whole line, extending from beyond Bodie Bluff to the Queen Bee, the developments already made ensuring the erection of such works upon every mine of the lead. This promises to be the most brilliant season yet experienced by Bodie, and yet the tale it but half told. Another year, when greater depth is gained in our mines, and the rich ore bodies there uncovered and brought to the light of day by the persevering industry of our hardy miners and the aid and energy of capital, we may expect another hegira of sick Comstockers, and others from all parts of the coast. At present our population exceeds the resources of the town, and the result must be disappointment to many. It is worse than folly; it is downright madness, for every idle man in the State to come to Bodie expecting work. So, too, with merchants and traders; we already have a surplus. Though a rich and growing camp, yet the limit is passed at which all can do well.

UNITED STATES GRAND JURIES.

On the 30th of June the President approved the following Act of Congress that guarantees the right of both political parties to have a voice in the seleetion of United States Grand Juries :

All jurors—grand and petit, including those summoned during the session of the Court—shall be publicly drawn from a box containing, at the time of each drawing, the names of not less than three hundred persons possessing the qualifications prescribed in section 800 of the Revised Statutes, which names shall have been placed therein by the Clerk of such Court and a Commissioner to be appointed by the Judge thereof, which Commissioner shall be a citizen of good standing, residing in the district in which such Court is held, and a well-known member of the principal political party in the district in which the Court is held, opposing that to which the Clerk may belong, the Clerk and said Commissioner each to place one name in said box alternately, without reference to party affiliations, until the whole number required shall be placed therein. But nothing herein contained shall be construed to prevent any Judge ordering the names of jurors to be drawn from the boxes used by the State authorities in selecting jurors in the highest Courts of the State; and no person shall serve as a petit juror more than one term in any one year, and all juries to serve in Courts after the passage of this act shall be drawn in conformity therewith; *Provided*, that no citizens possessing all other qualifications which are or may be prescribed by law shall be disqualified for service as grand or petit jurors in any Court of the United States on account of race, color or previous condition of servitude.

THE POLITICAL SITUATION.

Never in the history of the State did a better opportunity present itself for a complete regeneration of political parties than the present. The adoption of the New Constitution by an overwhelming majority gave to the Workingmen a perfect assurance of electing nearly every officer in the State. This would undoubtedly have been the case, except in strong Republican or Democratic counties, had they placed proper men upon their ticket. But with such a leader as Doctor Glenn, hope dies with the most ardent well-wishers of the cause. The Democracy, without a leader and with no proper organization, can scarcely hope for success. The Republicans, well organized at all points, will make a desperate struggle, and though largely in the minority, have good chances of success.

The "Sun" Moralizes.

NEW YORK, July 26.—The *Sun* has the following: Ledermeyer, the wheelbarrow man, if he has proved nothing else by his tramp across the continent, has shown the falsity of the theory that the Indians of the far West are always eager to take a white man's scalp. He traveled more safely by night and day among those Western savages than he could have done in a five-months' journey through the streets of New York. Indians in plenty he and his companion saw, but they did not harm a hair of the two travelers, nor did they pilfer from the much trundled barrow. It was prudent for Ledermeyer and Potter to let the Indians alone, and that policy became their complete protection.

TELEGRAMS.

Associated Press Dispatches over the Nevada and California Line.

[SPECIAL TO THE MORNING NEWS.]

DOMESTIC NEWS.

California Fruits in England—"Westward the Star of Empire"—Sherman's Course Criticized—The Darien Ship Railroad—Coast News—Etc.

Cannot Have Tents.

WASHINGTON, July 26.—The Secretary of War states that he cannot grant St. Louis tents for the yellow fever refugees.

Our Products Abroad.

NEW YORK, July 26.—The Angelo-American Food Supply Company, recently organized in London, advertise in their prospectus to supply California fish and fruits among the other popular American articles consumed in England. The average sale in London of American beef is now computed to be about 5,000 quarters per week, and there are not half a dozen butchers in London who do not sell it. Of this only about 300 quarters are retailed, as American beef is being sold at extortionate prices as compared to English beef. It is stated that but for the greed and unfairness of English butchers the people could purchase meats at greatly reduced prices.

A Decision Reversed.

TRENTON, July 26.—The Court of Appeals and Errors has reversed the decision of the lower Court in the case of Mrs. Smith and Bennett, convicted of the murder of Policeman Smith, the husband of the condemned woman, in Jersey City.

The "Tribune" on the Progress of our Country.

NEW YORK, July 26.—The *Tribune* says: The tales they tell of Leadville and other mining centers of the West have made a remarkable sensation throughout the world. It can almost be said that people are swarming to those regions from all corners of the earth. But after all, only a part of the great current of humanity which is moving westward now, is drawn toward the mines. The larger part of it is attracted by the exuberant fertility of soil, the health and independence of an agricultural life, and the passion for the ownership of a bit of land, things which have for cool-headed men charms as alluring to the imagination as the prospect of the sudden riches to be got from the mines. A dispatch from Washington shows that immigration to Colorado has by no means fallen off. This eagerness to occupy new farming lands beyond the Mississippi is as gratifying as it is full of promise for the future of the country.

Sherman Severely and Justly Rebuked.

NEW YORK, July 26.—The *Times*, today, attacks Sherman's speeches as disappointing and unsatisfactory as his indorsement of an unworthy attempt to turn the silver craze to Republican account, and keeping out of sight the perils which surround the financial policy, of whose success he boasts, is as unjust to himself and to his office as to the party which has trusted to his integrity and courage. When the financier is sunk in the politician, the statesman becomes the echo of the partisan. The managers' candidate for the Presidency, throws away quality, which alone could render his nomination desirable. A *World* special asserts that Sherman's Maine tour is a failure. The attendance and enthusiasm is small.

The Darien Ship Railroad.

NEW YORK, July 26.—Francis A. Keiffer, of Paris, a French engineer, and the accredited representative of a syndicate of Parisian bankers and speculators, who propose to build a ship railroad across the Isthmus of Panama, arrived on Wednesday. He said to a *Tribune* reporter last night that the object of his visit at this time was to interest some American engineers and capitalists in the proposed undertaking known as the Sebillott system, after the engineer who claims to have originated it. Keiffer said that the American approval of the Sebillott project was all that was needed to induce French capitalists to subscribe sufficient money to build the road. Sebillott proposes either to build his ship railroad from Aspinwrll to Panama, or a ship canal of 30 kilometers to the mountains, then a railway of 33 kilometers to another canal of 10 kilometers to Panama. The rails are to be laid about 12 meters apart, and are to weigh 660 kilogrammes to the meter. The highest point on the line will be 85 meters above tide water. Vessels up to steamships of 7,000 tons will be transported over tais railroad in immense docks, supported by wheels 12 inches thick. It is proposed that these docks shall be run under water to receive the vessel, which will then be securely held in an upright position in them by a system of arms or clamps. Driving power will be placed in the docks themselves under the bulge of the vessel, and will be applied directly to the wheels under the dock. Kieffer claims that these docks will be capable of a speed of fifteen to eighteen kilometers per hour, and that the whole distance can be traversed in five hours. The entire cost of construction he estimated at 250,000,000 francs, while the ship canal favored by De Lesseps will demand a capital of 1,500,000,000 francs. He also says that the tariff on vessels passing over this railway need not be higher than one half dollar per ton, against three dollars per ton by canal to yield a fair percentage on the capital; that while seven years must elapse before the canal can be completed, the railway can be in operation at the end of three. Kieffer said that pern ission was granted by the Colombian Government to Sebillot in 1873 to construct such a ship railway across the Isthmus.

Bay Items.

SAN FRANCISCO, July 26.—In the City Criminal Court to-day, the case against Davis, for battery on Denis Kearney, was dismissed.

The Republican primary election, to elect members to the County Convention, is going on quietly thus far. A determined fight against Mac Hine is being made. In the Sixth Ward, Jim Gannon attempted to create a disturbance because he failed to obtain a representation on the board of officers of the election, but the firm attitude of the Inspector nipped it in the bud.

A Chinaman was killed to-day by the street cars, at the corner of Folsom and Twenty-second streets.

The Schultz case was continued in the County Court this morning. The defense wished to offer in evidence the complaint, injunction, and application in the case of the Alta against the Justice mine; also the order for a change of venue from the Sixth District Court to the United States Circuit Court. The prosecution objected, but the Court allowed the admission of the evidence. Court then adjourned to next Monday.

FOR SALE.—ONE HOUSE AND LOT 50x100 feet, second door south of the Pioneer Brewery, on Wood street. Inquire at the premises. jel1tf

Sam Platt, the live clothing dealer of Bodie, and one of the firm of Koppel & Platt, is making extensive arrangements for the reception of the largest and best selected stock of clothing, furnishing goods, etc., ever brought to Bodie, of the latest styles and finest quality. Failing to find any house large enough for the purpose this firm are compelled to sell the stock now on hand, consisting of as fine an assortment of clothing and furnishing goods as can be found in the State, at cost, in order to make room, and those desiring bargains should avail themselves of this opportunity, as their fine stock now on hand must be disposed of. The alarmingly low prices at which the goods are marked down cause other clothing merchants to tremble, and though death to traders it is a harvest to the buyers. The reputation of this firm for square dealing is too well known to require commendation, and this clearing out sale is no Peter Funk, as is usually the case, but means business. If you want bargains call and try them. *

We call attention to the notice of D. H. Birdsall, agent of the Giant Powder Co., that appears under the head of new to-day. It is important to consumers of powder that they read it.

WEEKLY MINING SUMMARY.

The prospects on the whole line of the lead never looked brighter, so far as real merit is concerned, than they do to-day, yet through the manipulations of mining stock operators the Bodies received a fearful shock during the past week. It is a satisfaction, however, to feel that the bottom has been reached, with a well-grounded hope, formed upon the solid merits of our mines, that they will gradually resume a figure nearer their true value. We will now give what we know of our mines:

Standard.

The north drift on the 385-foot level is in 293 feet. There is no change to note in the ledge. They are taking out about 4 feet of good ore on the foot wall. The raise is now up 230 feet above the drift. During the week a crosscut was run through to the hanging wall and it was found that the ledge at this point is 12 feet wide and of fine ore. In the stope the ledge is about 10 feet wide and is looking very well. Since our last report connection has been made between the west crosscut on the 450-foot level (incline) and the north drift on the 385-foot level (new shaft.) The winze in the west crosscut on the 550-foot level of the incline has reached a depth of 37 feet; the ledge is 37 feet wide and of good ore. The uprise from the north drift on the 550-foot level is up 42 feet. The ledge here is 8 feet wide, and is also fine ore. In the West Standard slope the ledge is 10 feet wide and of the usual rich ore. In the south drift of the 550-foot level the ledge is 7 feet wide and of good ore. In the stopes of the Gildea the ledge is 3 feet wide and looks well. The mine is looking well throughout, and good progress is being made in laying the foundation for the machinery at the new shaft. The lumber for a new building at the incline shaft is arriving, and its erection will be commenced at once.

Maryland Con.

Extensive preparations are being made at this mine for the reception of the new and heavy hoisting and pumping machinery now en route from Carson. The incline is down 370 feet. It is the intention of the company to drift from the 150-foot level and from the bottom of the incline shaft to the line of the vertical shaft, and commence raising and sinking from the four points—the surface, the 150-foot level and the bottom of the incline, running four shifts at the same time—by this means sinking a vertical shaft in the shortest possible time. Work has been commenced on the foundations for the new buildings, a contract having been let for the purpose of erecting them in accordance with plans and specifications. These buildings, when completed, will have a massive appearance, and materially add to the real merit of this valuable mining property. They will equal in appearance and utility any hoisting works on the lode.

University.

The new shaft has attained a depth of 30 feet. The ledge in bottom shows a solid width of 3½ feet of good ore, with indications of an increase in size as sinking progresses; alterations to suit machinery are all completed, and sinking already resumed, which will be continued with all the speed that powder and muscle can accomplish, until the arrival of the hoisting machinery. Up to the present time have worked but one shift, but a night shift will be put on at once, and for the future the showing of work done will be proportionately increased. Tracing the ledge to the southward is now finished, and the men at that work will be put on the shaft at night.

Jupiter.

Shaft is now down 390 feet, and in the bottom shows a very strong and clearly defined vein of fair ore, which is widening rapidly as depth is attained. The south drift in the Masten vein is now in 130 feet, the ledge in the face being three feet wide of fair ore. The winze on the Daly vein is now down 85 feet, the ledge in the bottom being four feet wide of clean ore. By Monday next the shaft will be down to the 400 foot level, at which point a station will be cut out, and cross-cuts started east and west, for the Masten and Daly veins. A self-dumping skeet and a safety cage have been ordered, and will soon arrive and be placed in the mine.

Red Cloud.

The west cross-cut, 400-foot level, has been advanced during the week 15 feet. The face now in soft, red, rusty porphyry, mixed with clay. Several small feeders of ore have been cut, assaying $50 and upwards in gold. The prospects are good, and strong hopes entertained of soon cutting a ledge on this drift. The east cross-cut of this level has been advanced 9 feet, the face now being 27 feet east of the West Chester ledge, where a feeder or small strata of quartz has been cut, and a heavy flow of water encountered.

Tioga.

Have finished enlarging the shaft from the 520-foot level down. The north drift, to connect with the Syndicate Tunnel, 520-foot level, is now in 242 feet, in favorable working ground. The west crosscuts are in vein matter, with favorable indications of soon striking the Yerrington vein. The winze on the 320-foot level is now down 120 feet. The ledge is five feet wide, of a good quality of ore. Work in all parts of the mine making good progress, and the machinery is working well.

Summit.

The north drift, 200-foot level, is in 301 feet; progress since last report, 10 feet; the ledge is two feet wide; the east crosscut from the drift has been extended since the last report eight feet; total length, 176 feet. There is no change to note in the character of the formation passed through. North drift, 300-foot level, is in 186 feet; progress since last report, 23 feet; the ledge is three feet wide. The south drift, same level, has advanced during the week 26 feet; total length, 190 feet; the ledge is two and a half feet wide.

Booker.

Sinking the main shaft and making good progress. The pumping-machinery working well and easily handling the water. The shaft is now down 370 feet. Are now putting in a balance-bob at the 200-foot level. At the 400 level, expect to drift and crosscut for the ledge. The arrangements for working this mine are the best on the lead, except the Standard, having heavy machinery, with a capacity to sink 2000 feet. The management is excellent.

Glory.

Still sinking the incline following the ledge, which is about 3½ feet wide in the bottom, of very fine character of quartz; experts who have examined the mine pronounce it a very fine prospect, fully as promising as anything in the district. When the same depth is attained, this mine will no doubt rival the Noonday. It is the intention to push the shaft down as rapidly as possible, with a view to opening up this valuable property.

Con. Pacific.

Work in the mine is temporarily suspended till the completion of the hoisting works, which are being erected as fast as men and money can put them up. The gallows frame was being hoisted into place last evening, and is one of the finest in Bodie. The machinery is all first-class, and is being put up in superior style. Where work was stopped in the mine the ledge was as large and better in quality than at any point above.

Mono.

Still sinking the shaft, now down 445 feet and making rapid progress, the pumping-machinery working well and giving perfect satisfaction. The joint drift on the 400 level is in 330 feet, passing through favorable ground. On the 400-foot level, east drift, have cut 4 feet of fine grade ore. Still in porphyry and vein matter, and expect within 40 feet to cut the rich Bodie vein.

Syndicate.

During the past week the ore shoot has been enlarged and timbered. The main tunnel is prepared to run a mule train for delivering ore to the mill, the track running directly to the mill. The Osceola south drift was advanced 8 feet, the ground in the face becoming more favorable. Good progress is being made in the crosscuts from the Osceola Tunnel to the New Mexico and Isabella ledges.

South Belvidere.

Sinking the main shaft continues, work being pressed vigorously, formation favorable, with no material change to note for the week. Since last report a gain of 9 feet has been made, making a total depth of 127 feet, the ground working well, with favorable indications at the bottom of the shaft, being in stratas of good, lively quartz. Ledge pitching to the east.

West Pacific.

Still sinking shaft; ledge increasing in width and strength as depth is gained; improving in quality; dipping to the east; indications that the ledge will leave the shaft, continuing at the same dip, within the next ten or twelve feet. At the depth of 100 feet a drift and cross-cut will be run, when, from present indications, good milling ore will be the result.

Boston Consolidated.

This company and the Last Chance Company, adjoining it on the same ledge, have jointly ordered a bill of lumber for timbering the incline shaft on the line between the two companies, which is now 75 feet deep and will be sunk to a depth of 300 feet as speedily as possible. A strong ledge of good ore shows plainly all the way down the incline.

Black Hawk.

The east cross-cut on the 320 level is in 143 feet. During the past week have cut several seams of clay and quartz. All indications are good. The north drift on the Warren vein is in 140 feet; ledge looking well. The winze on the Warren vein is now down 110 feet; ledge looking well and improving as depth is gained. Machinery working well.

Crœsus.

The sinking of the main shaft is progressing rapidly, in a favorable formation. It is the intention to sink the shaft to the 100-foot level and drift for the ledge. From the location of this mine, with the developments made in those adjoining, there is a certain prospect of opening up a valuable mining property.

Bulwer.

The south drift, 380 foot level, is in 119 feet; progress since last report 10 feet; the ledge is 2½ feet wide, and looking very well. During the week connection was made between the drift and the west crosscut from the 200-foot level of the Bodie mine. There is no particular change to note in the tunnel. The rock is still very hard.

Vortex.

Sinking the winze from the north drift is still being pushed ahead vigorously, the ledge continuing to look well, and the ore improving in quality as depth is attained. The ore vein is 2½ feet wide, all good ore, assays averaging over $100 in gold and silver. The indications are favorable for opening up a good mine.

South Noonday.

Work in and around this mine, as usual, is making good progress. The north and south drifts on the 75-foot level are still being run from the incline shaft. In the north drift the ledge is looking well—18 inches wide, of good ore. In the south drift the ledge is 12 inches wide, of good milling ore.

Addenda.

Work for the past week has been confined to the south drift at the 460-foot station. This drift is now advanced 150 feet from main shaft. West crosscut is now in from same drift 25 feet, and the east crosscut is advanced 20 feet. The water has comparatively dried up in the face of the drift.

South Bulwer.

Work on the 350 level is being pushed as usual; the ledge is solid, looking well, is 3½ feet wide of good ore. Are still sinking the winze from this level in good ore, with a 3 foot ledge; the formation is favorable, and all indications are good.

Oro.

Work on the Oro is opening up. The mine is progressing as rapidly as the force employed will permit. The mine gives promise of yet making a noise in the mining world.

Rustler.

Timbering the shaft is nearly completed, and the ground prepared for putting up the hoisting works and steam machinery that is expected to arrive soon.

We call attention to the advertisement of Mr. Ravenell, that appears under the head of "new to-day." Mr. Ravenell is a perfectly reliable and responsible man, and will fulfill his contracts; with mill and mining men this is a material consideration.

It was on Main street. The teamster was unloading his freight. Two large cases fell to the ground with a crash and a barrel followed them, leaving a wreck of egg-shells and splinters. The prayers of the teamster shocked our moral sensibilities and we left.

Workingmen's Meeting Last Evening.

The regular meeting of the Workingmen's Club of Bodie was held last evening at Miners' Union Hall, President F. Horan in the chair. After the reading and adoption of the minutes of the previous meeting, the proceedings of the County Convention were indorsed. Parties were then invited to sign the roll, and many new members were added to the club.

The resignation of Jas. Mulligan and Mr. Kelley from the County Committee were accepted. Mr. Minkie and Jas. Finley were nominated and elected to fill the vacancies on the County Committee.

Mr. Soderling resigned the Vice-Presidency of the Club, and Mr. Coffin was elected to fill the vacancy.

Nominations being in order for Township officers, P. Killiher nominated J. P. Wall and Robt. Minkie for Justices of the Peace, who were chosen by acclamation. James Harigan, James Mulligan, Peter Gunning and S. F. Kirgan were placed in nomination for Constables; Harrigan and Mulligan, receiving a majority vote, were declared the nominees.

All the candidates came forward and renounced their allegiance to the old parties with whom they had hitherto affiliated, and declared themselves Workingmen. The hall was crowded, and the utmost enthusiasm prevailed. It is clearly evident that the Workingmen are going in to win. Their proceedings are marked by the most perfect order, and the selection of their candidates made from the best men in the county, their only test being, are they honest? are they capable?

Deacon Parkinson, editor of the Carson *Tribune*, is in the city, writing a series of interesting letters to his paper. Through the irregularity of the mails, or some other cause, he does not get his paper—or if he does, he don't read it—and this gives rise to a variance of opinion in the columns of his paper. The paper says that Frank Page is a scrub and ought to be defeated for Congress in this State, while the Deacon's letters say he is a first-class man and deserves re-election. Pull the string on the Deacon, "Ed," so that his sentiments on political questions will chime with your own.—*Exchange.*

We call attention to the advertisement of Julius Halbsguth that appears under the head of new to-day. Mr. Halbsguth is aware there are but few musical instruments in Bodie, and that a good teacher will not find it profitable at the present time, but having every confidence in the brilliant future of our town, will remain with us, believing that his course of instruction will give perfect satisfaction.

An Intelligent Horse.

It was on the hill, a pet horse running loose, following the wagon. The driver, drunk, got down from his seat and went to cruelly beating his team. The horse run up, grasped his arm with his teeth, gave him a shake, turned stern too, and the man went flying down the hill.

Divine service will be held to-day at the Odd Fellow's Hall at 10½ A. M. and 8 P. M., G. B. Hinkle officiating. Sabbath-school at 2 P. M. The public are invited to attend.

A dog fight in Bodie is a rare occurrence. Five hundred men witnessed one on Main street yesterday, and all were evidently highly pleased.

West & Bryant are daily receiving monster loads of iron and hardware.

The White House Dry Goods Store has received a splendid stock of new goods of the latest styles.

BUSINESS LOCALS.

To Rent.

The Cosmopolitan Hotel, for rent and furniture for sale. Being situated near the postoffice and in the business center of the town, it presents a better opportunity to transact a profitable business than any other hotel in Bodie. It contains twenty bed rooms, with a large and commodious dining room. She also offers for sale all her household furniture and effects, consisting of everything necessary to conduct a first-class business. Apply on the premises. MRS. MONAHAN.

ANY AND ALL PARTIES HAVING legal claims against me will please present them on or before the 1st day of August for settlement. I am prepared to pay all legal bills of every kind.

Bodie, July 14, 1879. JOHN [illegible]

MORNING NEWS.

SUNDAY, - - - JULY 27, 1879.

LONG AGO.

'Twas spring time, and all nature stirred,
The season's pulse was young;
On bursting boughs full many a bird
His careless carol sung.
Beneath the interlacing shade
All wind-swayed to and fro,
A gracious youth and gentle maid,
Swore fealty, long ago.

The years had passed, the years had flown,
Sweet summer filled the air;
There walked within the covert lone
Brave man and matron fair;
And round them, with a jocund glee,
There danced, in life's full glow,
A troop of children fair to see
In days now long ago.

'Twas autumn next, the year grew pale,
The farmer reaped his grain;
Now walking slowly down the dale
Behold the pair again,
Their forms are bent. See in the hair
Some silver touches show.
Childless and sad they wander there,
And dream of the long ago.

'Tis winter. In the churchyard lone
The snow lies white and fair
Upon the simple mossy stone
That hides the aged pair.
They have their rest! 'Tis spring again!
And in God's land they know
A love not dimmed by age and pain,
Like that of long ago.

$20,000. $20,000.

TWENTY THOUSAND DOLLARS

WORTH OF

STAPLE AND FANCY

GOODS

ARTICLES OF COPARTNERSHIP.

STATE OF CALIFORNIA, COUNTY OF MONO. } ss

We, the undersigned, do hereby certify that we are partners transacting business in this State, at the town of Bodie, in the county of Mono, under the firm name and style of Marks & Wasserman, and that the names in full of all the members of such partnership are George C. Marks and Henry Wasserman, and that the places of our respective residences are set opposite our respective names hereunto subscribed.
In witness, whereof, we have hereunto set our hands this, eighteenth day of June, A. D. 1879:
[L. S.] GEORGE C. MARKS, Bodie, Mono county, Cal.
[L. S.] HENRY WASSERMAN, Bodie, Mono county, Cal.

STATE OF CALIFORNIA, COUNTY OF MONO. } ss

On this, —— day of ——, 1879, before me, Fred Elliott, a Notary Public in and for said county of Mono, personally appeared George C. Marks and Henry Wasserman, known to me to be the same persons whose names are subscribed to the annexed instrument, and they acknowledged to me that they had executed the same.
In witness, whereof, I have hereunto set my hand and affixed my official seal at my office, in said county of Mono, the day and year in this certificate first above written.
(SEAL) FRED ELLIOTT, Notary Public.

STATE OF CALIFORNIA, COUNTY OF MONO. } ss

I, David Jeffreys, County Clerk and ex-officio Clerk of the County Court in and for said county, do hereby certify that the certificate of copartnership of George C. Marks and Henry Wasserman, of Bodie, in said Mono county, has been this day filed in my office.
In witness, whereof, I have hereunto set my hand and affixed the seal of said Court this, 19th day of July, 1879.
(SEAL) D. JEFFREYS,
County Clerk and ex-officio Clerk of said County Court. jy24-4w

And in accordance with law, and an order of the Board of Directors, made on the sixteenth day of June, 1879, so many shares of each parcel of such stock as may be necessary, will be sold at public auction at the auction rooms of John Middleton & Son, No. 419 Pine street, San Francisco, Cal., on MONDAY, the eleventh day of August, 1879, at the hour of one o'clock P. M., of said day, to pay said delinquent assessment thereon, together with costs of advertising and expenses of sale.
WM. H. LENT, Secretary.
Office—Room 62, Nevada Block, No. 309 Montgomery street, San Francisco, California. jy26td.

OFFICIAL MINING MAP.

I AM NOW ENGAGED GETTING OUT AN OFFICAIL MAP OF

THE BODIE MINES,

and respectfully ask those desiring a place for their claims on the same to apply at once at my office.
C. L. ANDERSON,
jy24tf Deputy U. S. Surveyor.

NOTICE.

TO WHOM IT MAY CONCERN—THAT we, the undersigned miners, held a Miners' Meeting at the office of the Eagle Saw Mills, on the 12th day of July, 1879, in Mono county, California, and formed a new Mining District, which shall be known as the Buckeye Mining District, and shall be bounded as follows, to-wit: On the north by Byron M. Day's canyon, more familiarly known as the "Day Canyon" on the south by the Twin Lakes; on the east by the great valley known as the Big Meadows, and on the west by Walker River. P. G. Vibbard, G. E. Clark, J. H. Edwards, Jas. Rogers, J. J. Hickey.
P. G. VIBBARD, Recorder.
Dated the 12th day of July, 1879. jy24-4w

FOUND.—A PAIR OF SILVER BOWED Spectacles was picked up in the Bodie Bank on Tuesday last. The same can be obtained on application at the News office. je19tf
